

SYLLABUS

Course Name:	Graduation Thesis
Course Code:	GRA591
No of credits:	09
Time Allocation:	3 months
	Study hours (450h) = Contact hours (250h) + Final Assessment (3h) + Self-study (197h)
Prerequisite:	Pass 6 official subjects of the program Pass GRI501

I. DESCRIPTION

The Capstone Project provides students with a significant project experience in which they can integrate much of the material they have learned in their program. Students will be guided to develop a software system, employing knowledge gained from courses throughout the program. It includes the development of requirements, design, implementation, and quality assurance. Students may follow any suitable process model, pay attention to quality issues, and manage the project themselves, following all appropriate project management techniques. The project's success is determined by whether students have adequately solved their customer's problems.

II. MAIN OBJECTIVES

The following specific goals are aimed at and evaluated:

- Formulating problems and motivation with the help of the supervisor
- Acquiring information independently and assessing problems
- Learning to communicate in a scientific language through collaboration with fellow students and researchers.
- Using adequate experimental or theoretical methods and techniques.
- Critically analyzing the results and their interpretation.
- Reporting and presenting the original results orderly and placing the open questions in the right perspective. Linking techniques and results from literature as well as actual research and future research lines with the research.

Mapping CLOs to PLOs

	PLO1	PLO2	PLO3	PLO4	PLO5	PLO6	PLO7	PLO8	PLO9
CLO1	X			X					
CLO2				X					
CLO3						X		X	X
CLO4							X		
CLO5				X					
CLO6		X	X		X				X

III. TEACHING METHODS

The project is carried out in a guided practical format, where students complete the project under the supervision of a faculty advisor appointed by FSB, based on the field previously registered by the student (or the student may request an advisor and receive written approval from FSB). The assigned faculty advisor guides the student to meet the following requirements within the specified timeline. Detailed progress and specific requirements are outlined in the requirements section.

IV. STUDENT'S TASK

- Discuss selecting one topic with the supervisor.
- Write the thesis proposal
- Attend all scheduled meetings with the supervisor.
- Produce/write documents and products according to project scope.
- Defence work in front of examination board

V. TEACHING & LEARNING MATERIALS

Main resources: Thesis_Template_MSE_FPT University.

Tools: Appropriate tools for research, design and implementation.

VI. SCHEDULE

The supervisor/student sent the results to the program director at 4 milestones:

- Thesis proposal (after selecting the topic of thesis)
- Literature review/existing products (solutions) overview
- Middle of the thesis: announce the progress of the thesis
- The time before the end of the thesis

VII. ASSESSMENT

Project defense = 50% (Document) + 40% (Presentation + QA) +10% (published or verified by the business that has put the results into practice)

The thesis evaluation jury meets the regulations of ministry education and training

Completion Criteria: (The average score of all jury members)

Average score ≥ 5.5

APPENDIX: DETAILED ASSESSMENT

Assessment Category	Assessment Type	Weight	Minimum value to meet completion criteria	Duration	Learning outcomes	Number of questions	Scope of knowledge and skill of question	How
Capstone project	Final	100			CLO1-CLO6	1	Registered topic	Evaluation based on the following criteria: - 50% (Document) - 40% (Presentation + QA) - 10% (published or verified by the business that has put the results into practice).
